ABOUT US**

Energy Formation, gas sector processing training organisation

250
HIGH-ADDED
VALUE TRAINING
COURSES
including over
100 courses dedicated
to the gas sector

Energy Formation
is a Qualiopi
certified training
organisation.

We are therefore referenced by all professional training public funding organisations. This Qualiopi certification is valid for 3 years.

Quality certification has been issued for the following category(ies) of actions:
TRAINING SESSIONS.

Corporate training courses
attended/provided at Energy
Formation can be financed by your
OPCO (Government approved
vocational training organisation).

Consult them to prepare an application file.

more than
1,000
sessions

per year, taught by experts in their field, in the latest generation of specialised and adapted teaching environments.

over 15,000
trainees every year

over 30
educational
platforms on our
3 campuses:

Nantes-Montluc,
Gennevilliers and Lyon

110
collaborators
including
60 instructors
and designers

20
million euros
in annual
turnover

95%
of our trainees are
satisfied

Stéphane Doistau,
Director of Energy Formation

High-quality
professional
services
closer to you //

"For over 50 years, we have been considered in France as a key player in professional development in the gas industry. Our cutting-edge training courses - ISO 9001 and Qualiopi certified - are provided to several thousand students from all professional backgrounds each year. They chose Energy Formation and our teams to develop their know-how and to develop their skills in order to contribute to the green gas and hydrogen processing industry.

All the players in the new gas market as well as French and international companies in the automotive, construction, transport, industrial, design and engineering sectors already rely on and trust our expertise, our innovative teaching methods and our ability to provide for their specific needs.

Considering increasingly stringent business requirements in the sector, we are now deploying a dedicated training offer and proposing tailor-made training courses designed to cover the needs of the gas processing line."

DEVELOP
YOUR
SAFETY
CULTURE

PROVIDING
STUDENT-
ORIENTED
LEARNING
ACTIVITIES

ACTIVELY
PARTICIPATE
IN YOUR
ECONOMIC
AND SOCIAL
PERFORMANCE

Training package covering the entire gas processing line

TRANSPORT AND STORAGE

- Storage
- Pressure reduction
- Metering
- Security
- Operation and maintenance of the networks
- ATEX

CATHODIC PROTECTION

Preparation for the certification levels: Levels 1, 2, 3 and 4, complex structures and stray currents

OPERATION AND MAINTENANCE OF THE NETWORKS

Gas tracking and AIPR (authorisation for working gas pipelines)

Distribution

Safety procedures

Technical customer relations

Network construction

Biomethane injections

Smart meter

GREEN GASES & SUSTAINABLE MOBILITY

- Biomethane
- VNG
- Hydrogen

Tailor-made training courses that make a difference

In addition to the training courses listed in our catalogue, Energy Formation will work with you to design tailor-made educational content, adapted to your operational constraints and using specific learning methods. These training courses can also be provided on your customer sites. The objective of these customised courses is to optimise efficiency with perfectly targeted expectations.

Energy Formation's expert designers will provide assistance in the design of the specific training solutions for your teams, either by adapting an existing offer or by creating a new course adapted to your field activity conditions.

OVER 30 CUSTOMERS HAVE ALREADY CHOSEN A SPECIALISED COURSE

Innovation and education

Who are our instructors?

100% of Energy Formation's instructors have been recruited through a strict process aimed at validating both their expertise in the gas sector and their teaching skills. Energy Formation provides a 12-month course for instructors called DIAPASON (Approved and organised complementary teaching method based on relevant standards), which is validated by a professional instructor certificate recognised by the FFP (Federation of Professional Training) and delivered by the CEGOS certifying body. Our experts share their knowledge on first-class tools and equipment from Energy Formation.

Inventing new instructional tools

Inspired by neuroscience and boosted by digital technology, the teaching methods used are designed to deploy a privileged, global and exclusive learning model on the campuses, for the industry's processing sector and professional efficiency (e-learning, 3D printing, games and simulations, etc.).

Our 3 training campuses

The guarantee of territorial proximity closer to the daily activities of gas line specialists and to maintain the high standards and quality of training everywhere in France.

Training campus in Saint-Étienne-de-Montluc

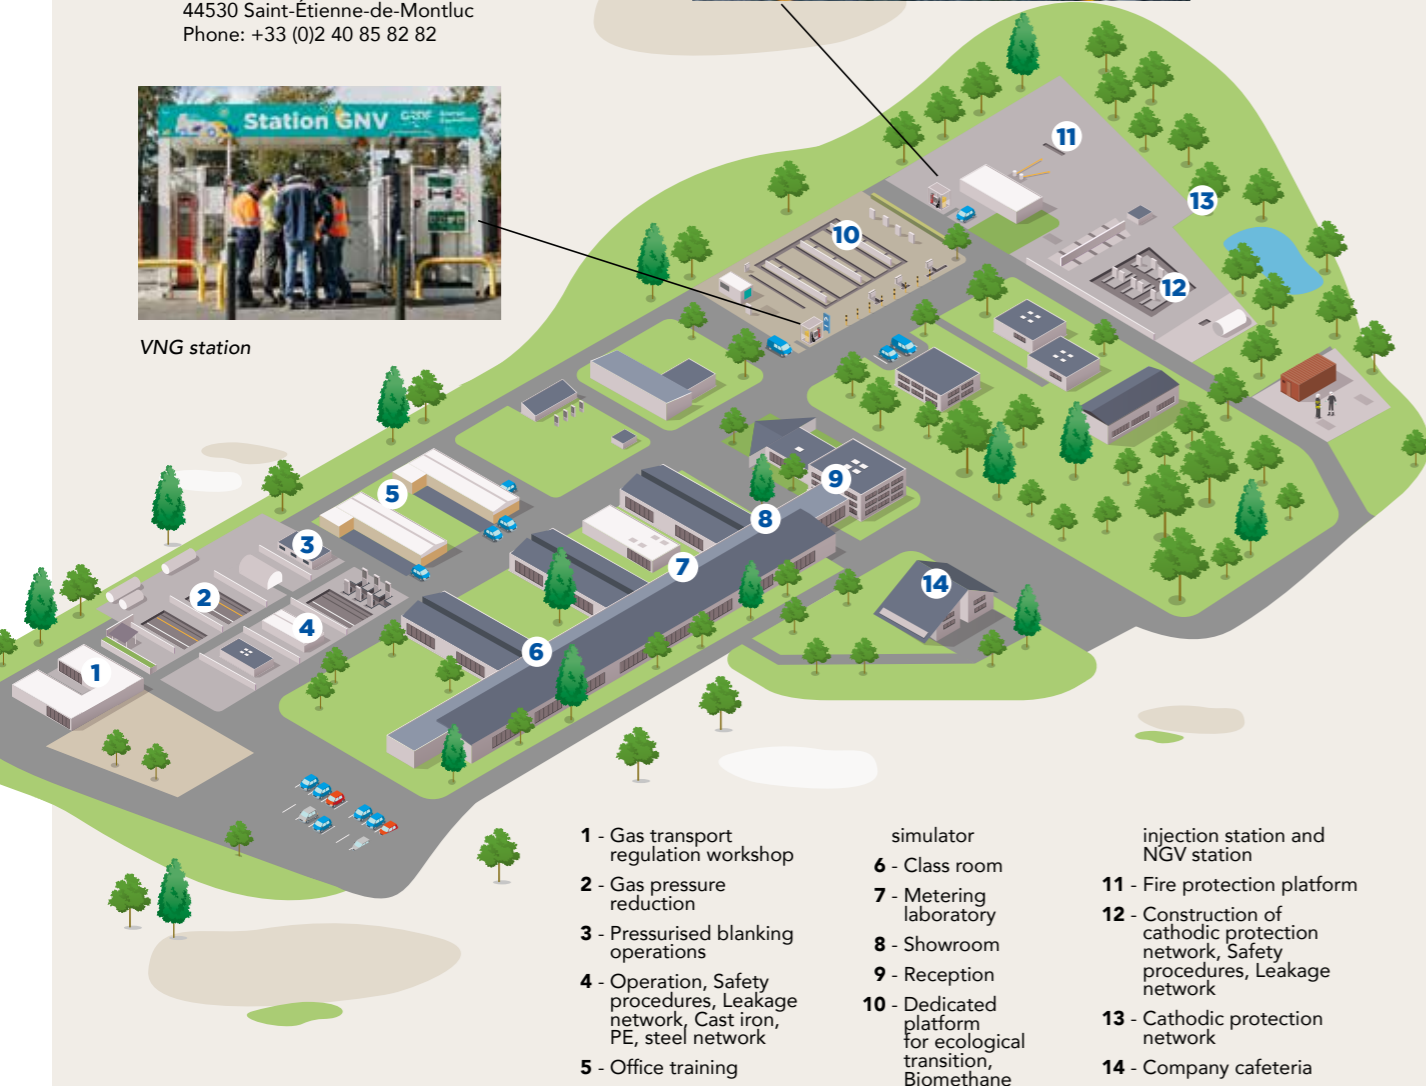

Croix Gaudin,
44530 Saint-Étienne-de-Montluc
